Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 18 is rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. 'Update of the first information source ...' critical or essential to the practice of the invention, included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

2. Claim 18 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There does not appear to be a written description of the limitation "update of the first information source is halted while the system is drawing power from the battery power source" in the application as filed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2645

4. Claims 13-15,17,92-94,96 rejected under 35 U.S.C. 102(b) as being clearly anticipated by **Miner et al.** (US 5,652,789).

As to Claims 13,92, with respect to Figures 28-30, **Miner** teaches a system for managing at least contacts (first) and persons (second) information sources comprising:

- a memory for storing data concerning an association of the first information source with the second information source (Figure 1);

- a device for selecting at least one direction of a flow of information between the first information source and the second information source (Figure 1, labels 16,18);

- an interface for accessing at least one of the first information source and the second information source through a communication connection (Figure 5 and Figure 28); and

- a processor for updating at least the first information source with information in the second information source in accordance with the direction (Col. 38, lines 52-65, Figure 28 and Figure 2, label 42).

As to Claims 14,93, **Miner** teaches the system of claim 13 wherein the first and second information sources contain contacts information (Figure 1).

As to Claims 15,94, **Miner** teaches the system of claim 13 wherein the first and second information sources contain appointments information (Figures 29-30).

Art Unit: 2645

As to Claims 17,96, **Miner** teaches the system of claim 13 wherein the first information source is updated while the system is idle (Col. 39, lines 59-67).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 16,95 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Miner** in view of **Stuntebeck et al.** (US 6,065,016).

As to Claims 16,95 the system of claim 13 wherein the communication connection includes a WAN (Figure 5);

Miner does not teach the following limitation:

Art Unit: 2645

“an Internet connection”

However, it is obvious that **Miner** suggests the limitation. This is because **Miner** teaches connections to a WAN (Col. 11, lines 51-53). **Stuntebeck** teaches the limitation (Figure 1, label 50). Having the cited analogous art at the time the invention was made, it would have been obvious to one of ordinary skill in the art to add Internet connection to **Miner**'s invention for accessing directory services as taught by **Stuntebeck**'s invention in order to provide numerous access channels

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stern et al. (US 6,731,927) teach context association for cellular directory assistance calls.

Molne (US 5,689,547) teaches storing requested telephone numbers in radio telephones.

Cox et al. (US 6,035,190) teach operator assistance and database access to retrieve requested directory listings.
